

## 12 Temperature measurement SCT analogue

### Temperature measurement SCT analogue

- High-pressure-resistant temperature sensors
- For measuring temperatures up to 1,000°C
- Flexible operation
- Inline or probe-type sensor

In hydraulics, temperature measurements serve to locate faults and avoid the kind of damage caused by excessive temperatures in critical parts such as pumps and proportional valves.

To obtain the exact temperature, the measurement is done directly in the tube or hose line.

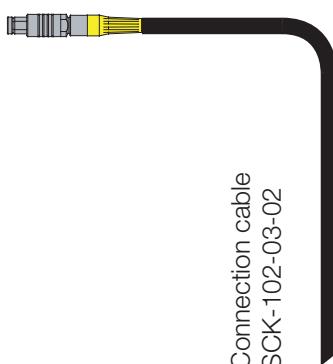

The inline sensors from the SCT-190 series can also be used in the turbine flow meters SCFT-xxx-02-02 to measure temperatures.

# 12 Temperature measurement SCT analogue

## Function specifications

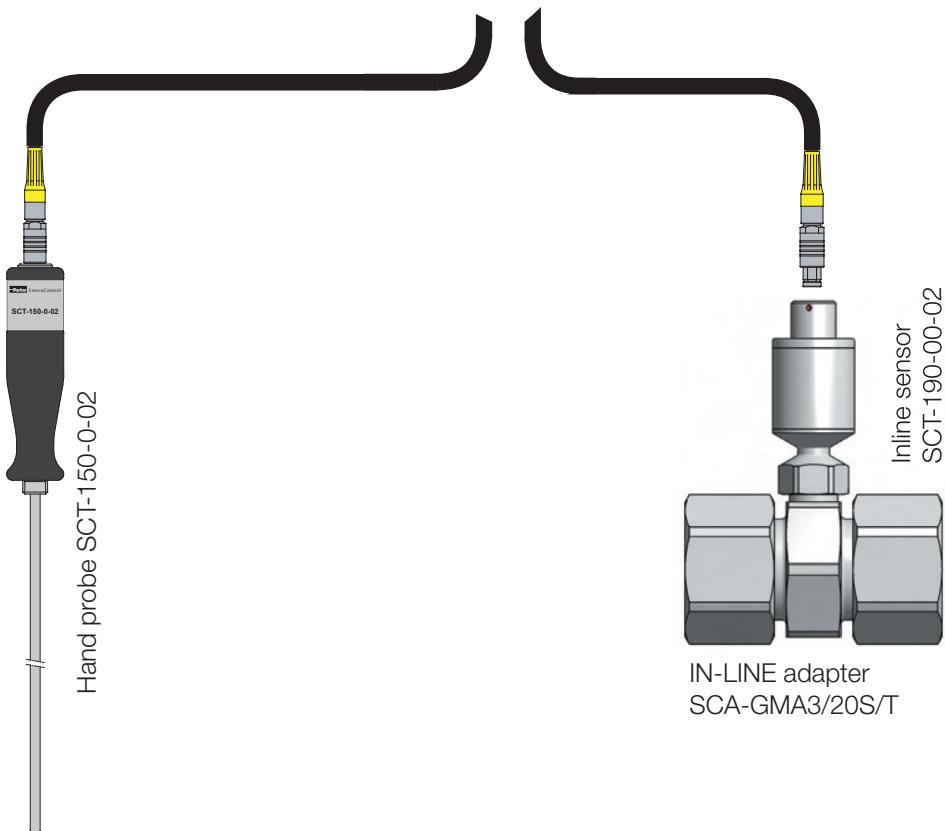

The Parker Service Master *Plus*  
SCM-500-01-xx or  
The Parker Service Master *Easy*  
SCM-330/340

Connection cable  
SCK-102-03-02

Parker Serviceman  
Plus SCM-155-0-02

Sensors

### Hand probe SCT-150 (-25 °C...+125 °C)

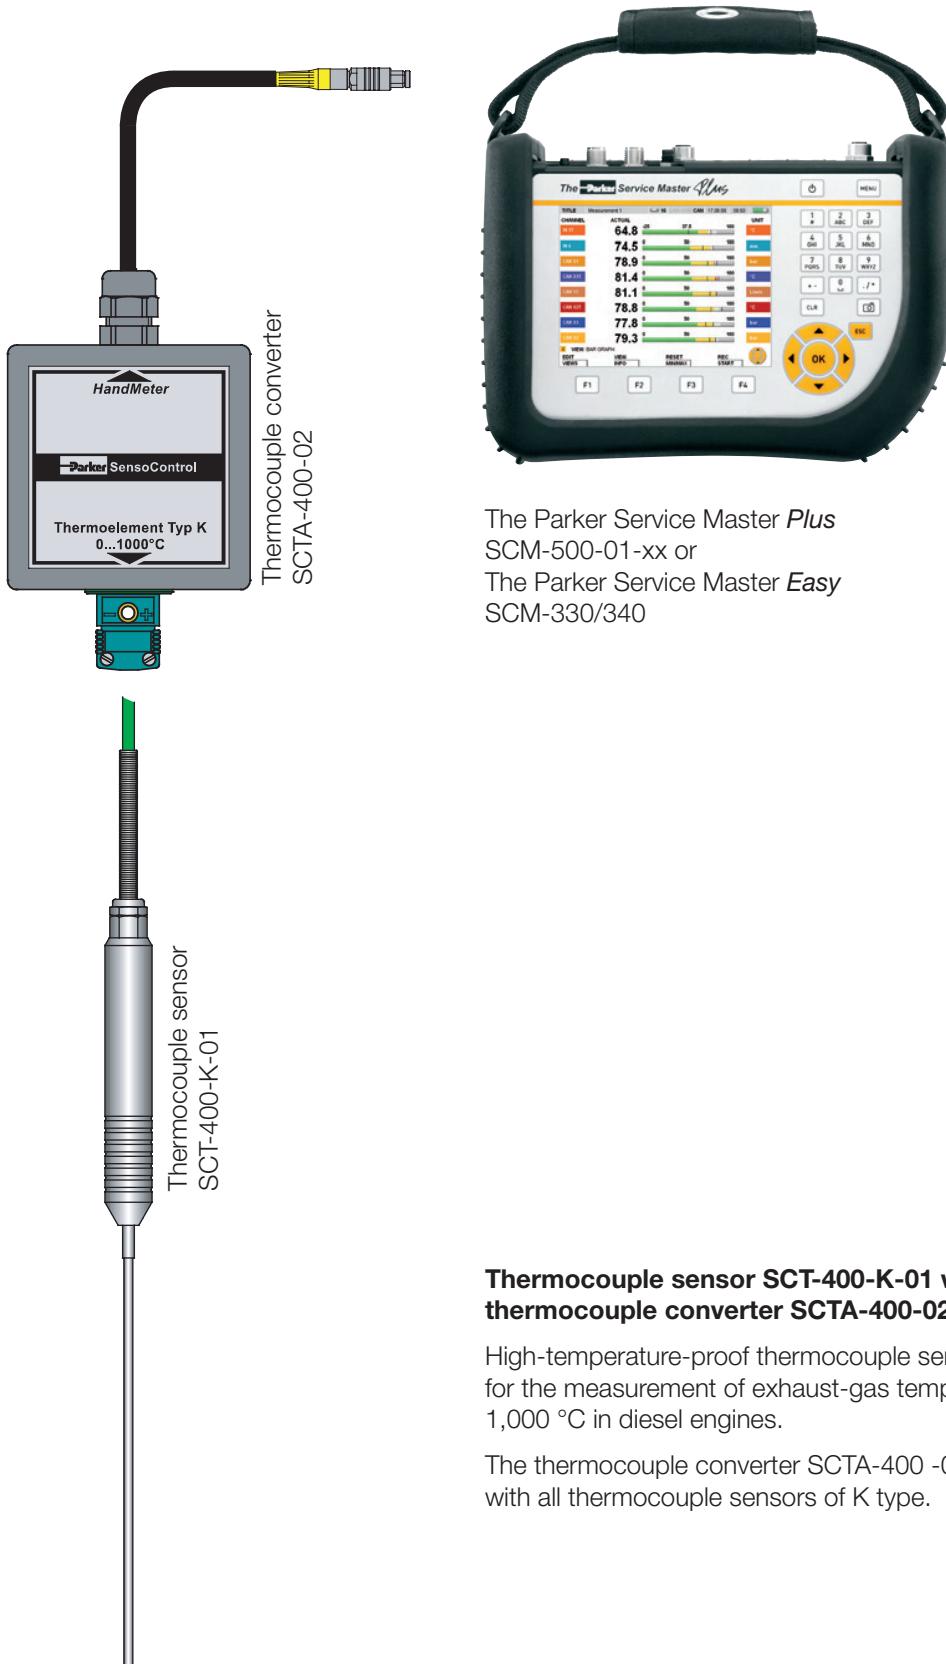

Temperatures in tanks and containers are measured with the hand probe SCT-150-0-02

### Inline sensor SCT-190 (-40 °C...+150 °C)

The inline sensor SCT-190-00-02 can be adapted to the hydraulic system up to a system pressure of 630 bar. The male stud is compatible with the measuring connections of the GMA3/20 series and with the turbine flow meter SCFT-xxx.

# 12 Temperature measurement SCT analogue

## Function specifications

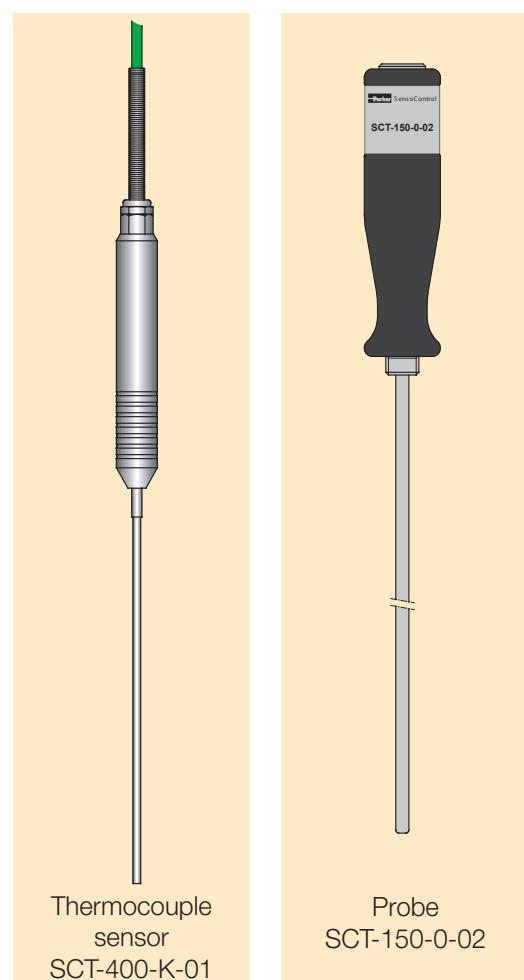

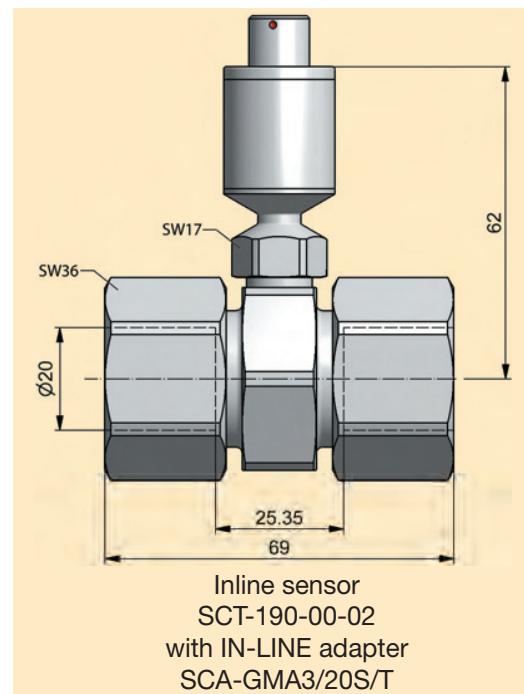

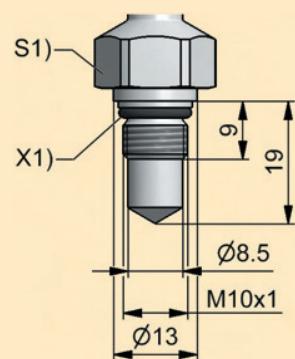

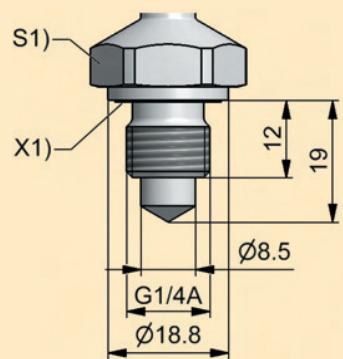

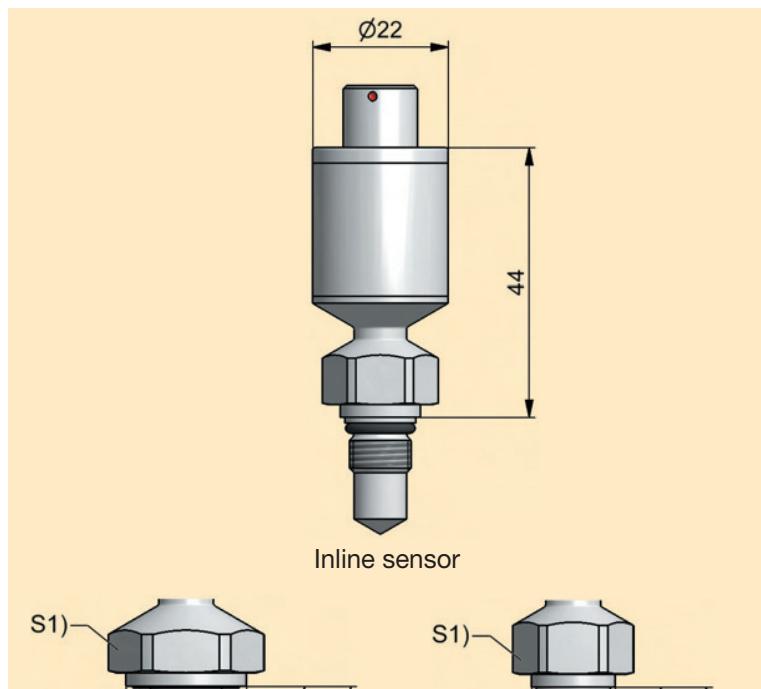

### Thermocouple sensor SCT-400-K-01 with thermocouple converter SCTA-400-02

High-temperature-proof thermocouple sensors are used for the measurement of exhaust-gas temperatures of up to 1,000 °C in diesel engines.

The thermocouple converter SCTA-400 -02 is compatible with all thermocouple sensors of K type.
